PAUL CATHEY

SOFTWARE ENGINEER

ABOUT

I'm engaged by the building and understanding of beautiful systems from code to philosophy to teaching.

I've been in Web Development for the past 2 years working on consumer-facing fin-tech applications currently with a mostly remote team.

I have mainly written and maintained Rails code bases backed with MySQL and Mongo DBs. I've been communicating with merchants across the country to deliver changes for thousand-store product launches.

I also have been maintaining an AWS infrastructure with DevOps tools such as Teraform and Ansible.

WORK EXPERIENCE

Software Engineer (Delivery Team)

Smartpay Leasing | Sep. 2018 - Present
